

STAKEHOLDER NOTICE

D75 Stakeholder Notice Northern OOG (oversize) Inbound/Outbound

Update: 09 September

BACKGROUND

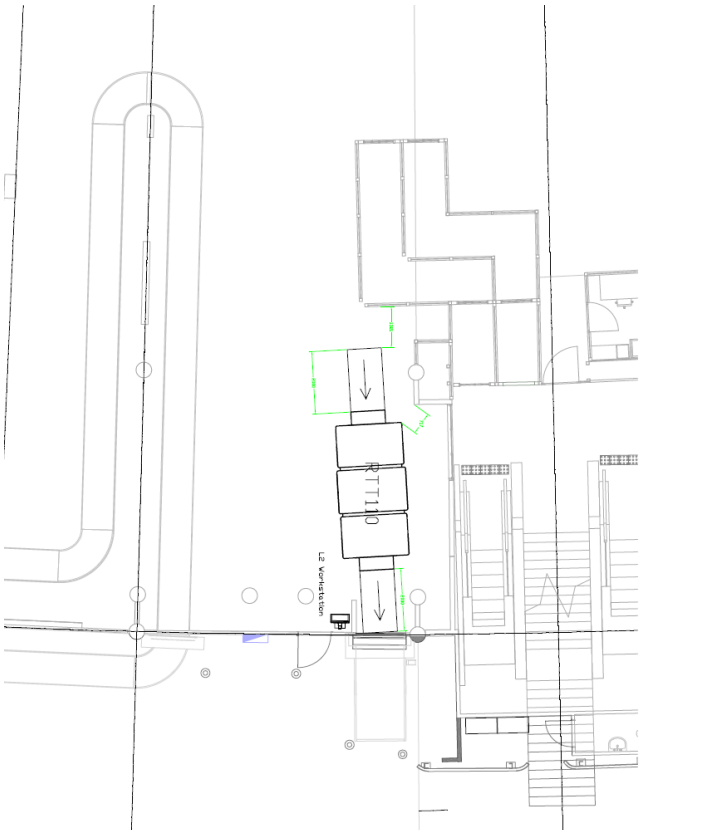

The Out of Gauge at Central checkin will be offline once the Central DTB is handed to Lend Lease for the mezzanine. To mitigate the operational impacts, the current inbound Northern OOG will be replaced with the new RTT Std 3 as the outbound out of gauge (oversize).

WORKS

Monday 16TH September 2024

The current inbound oversized belt will be decommissioned as Rapiscan commence the instal of the new Northern out of gauge screening machine which will assist with the JQ Temporary checkin move)

The existing OOG in Northern area will be replaced by RTT110 as below .

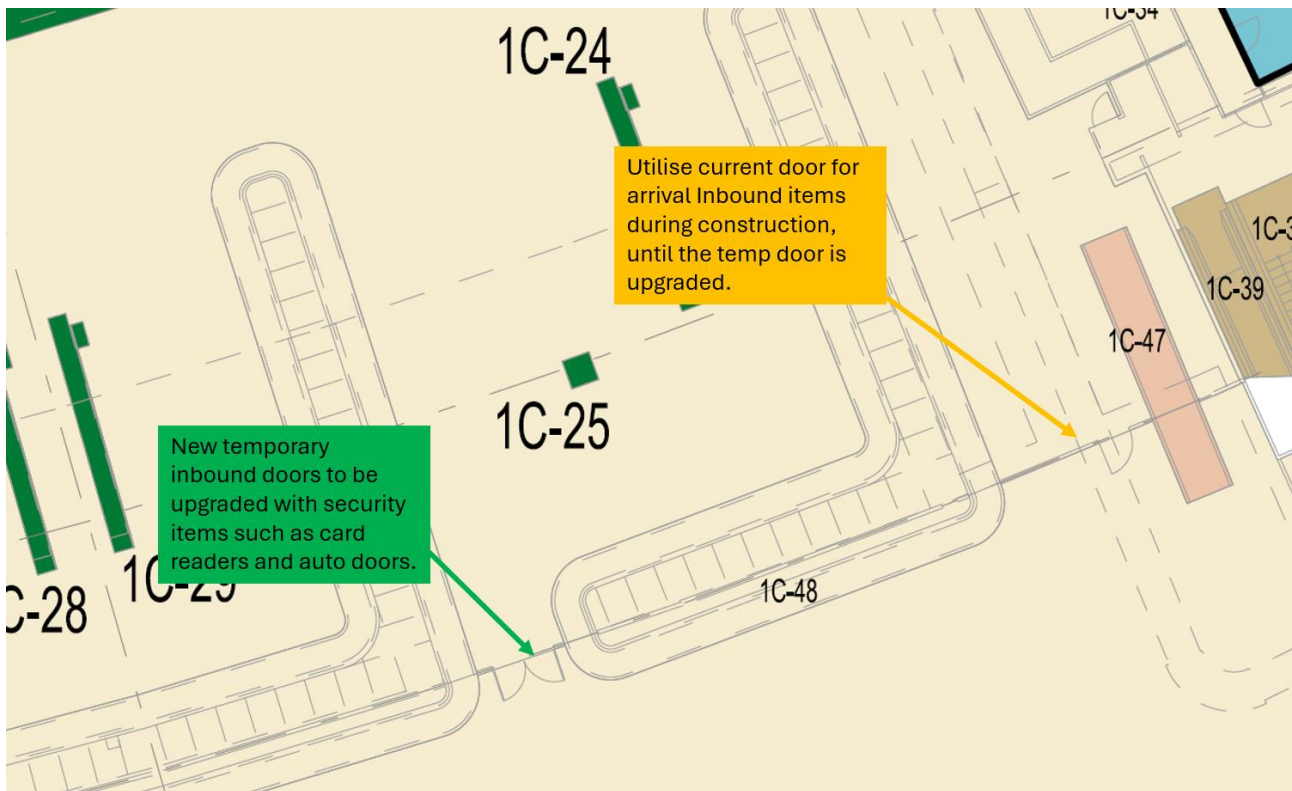

Any Noisy works will be undertaken outside of operational hours

IMPACTED LOCATIONS

IMPACTS

The dropping off of oversize will need to be manual brought in through the door next to the oversize belt .
Tensa belts will be set up to cordon off an area to place the oversize items on the floor

BAC is working with its contractors to shift the oversize drop off to the double doors between arrivals belts 1 and 2. To complete this we will need to provide siemens card readers and automated opening doors

Further updates on the works and utilisation of the new temporary door will be followed up with further communications.
