

Stakeholder Notice

International Terminal Security Retail Upgrade Project | Level 4 high level ceiling works near wire wall

STK-N I-89
Date 29 July 2025

The International Terminal Security Retail Upgrade Project (ITB SRUP) requires Level 4 high level ceiling works.

Scope of Works

Lendlease will install new ceiling grid systems and acoustic tiles to the Level 4 high level ceilings, adjacent to the wire wall.

To carry out works safely, an exclusion zone is required to be set up below the work area on Level 3. The exclusion zone will move progressively along the public space, adjacent to the retail tenancies as works progress.

To minimise the impact to passengers and stakeholders, exclusion zones impacting tenancies will be set up during tenancy non-operating hours.

Impacts

Type of works	Date Range	Time	Impacts
Level 4 ceiling grid system and acoustic tile installation	05/08/2025 to 22/08/2025	Between 22:00 to 06:00	Passenger pathways will be maintained with temporary barriers in place.

Location

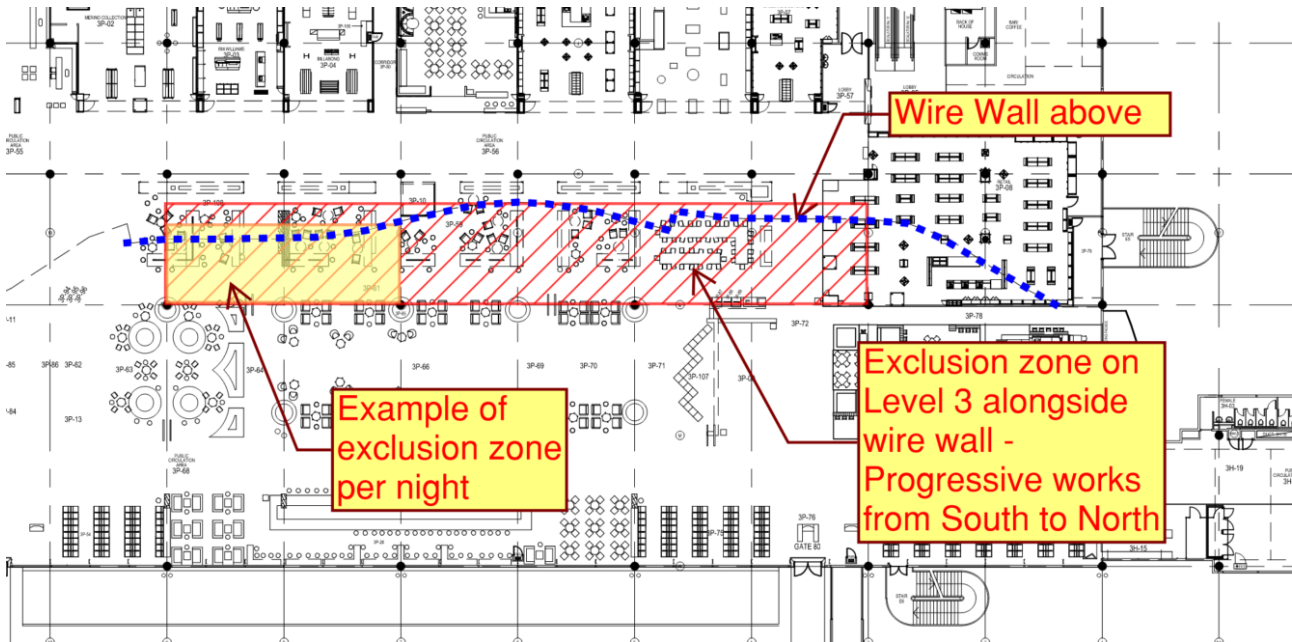

Figure 1 | Level 3 exclusion zone progressing from south to north

All unrestricted noisy works will take place between 11:30pm and 3:30am behind the hoarding.

Thank you for your patience as we work to minimise disruption as much as possible. While every effort will be made to limit noise to after-hours, some unavoidable daytime noise may still occur during the construction process.

We appreciate your understanding and cooperation as we complete the project efficiently and safely.
