

Stakeholder Notice

ITB SRUP | ITB CUSS | Lendlease
Work Hours Update – Levels 2, 3 and
4

STK-N I-91
Date 30 July 2025

As part of the International Terminal Security Retail Upgrade Project (ITB SRUP) and International Terminal Common User Self Service (ITB CUSS) Lendlease construction works continue throughout the terminal. This notice covers all work hours and unrestricted noisy works until further notice.

Overview

Work Hours

Construction activities will occur between 6:30am and 6:00am the following day, and this will remain the standard working window until further notice.

Unrestricted Noisy Works

To minimise disruption to passengers and staff, unrestricted noisy works are scheduled overnight within the following windows:

Level 2: 12:30am – 4:30am

Level 3: 12:30am – 4:30am (aligned with the Level 2 unrestricted noisy works window due to the noise generated within the void area impacting Level 2).

Level 4: 11:30pm – 3:30am

Lendlease will be carrying out noisy works over the coming months, with this notice covering noisy work hours until further notice. While we'll aim to schedule noisy activities outside of peak hours, some daytime noise may be unavoidable.

Any changes to the 4-hour unrestricted noisy works window will only occur in exceptional cases where critical operational needs arise. While BAC initially proposed adjusting the window with one week's notice, frequent changes could impact multiple stakeholders, so we will avoid regular amendments to maintain consistency and minimise disruption.

Thank you for your understanding and cooperation.
