

# Stakeholder Notice

## ITB SRUP – Flight centre column

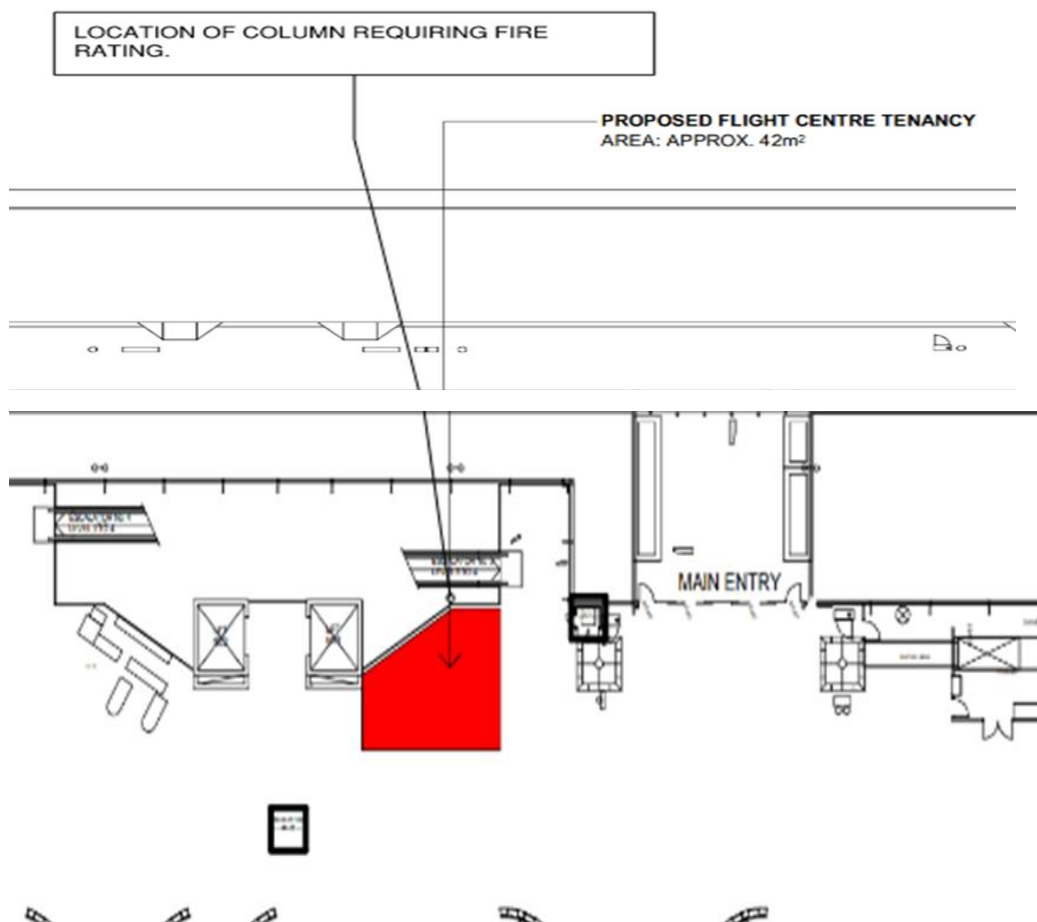

STK-N I-90 (Updated)  
Date 4 August 2025

As part of the larger works involved with the SRUP Project, the staging of the works has required the relocation of the Flight Centre Tenancy. The new Flight Centre Tenancy requires an existing steel column adjacent to this location to be fire rated.

### Location

ITB L4 northern escalator.

## Scope of Works

On level 4, two glazed panels adjacent to the Flight centre column will be carefully removed. Temporary barriers will be installed to secure the area and support upcoming activities.

Scaffolding will be erected around the column to facilitate surface preparation and application of fire rated paint. Once complete, the scaffolding will be dismantled and the two glazed panels will be reinstated.

## Impacts

To establish an exclusion zone beneath the work area, the Northern escalators will require temporary isolation during the removal of the glazed panels, barrier installation, scaffolding erection and removal.

### Glazed Panels works

Date: 08 August

Time: 1100

Duration: Approximately 2-3hrs.

### Scaffolding Installation

Date: 11 August

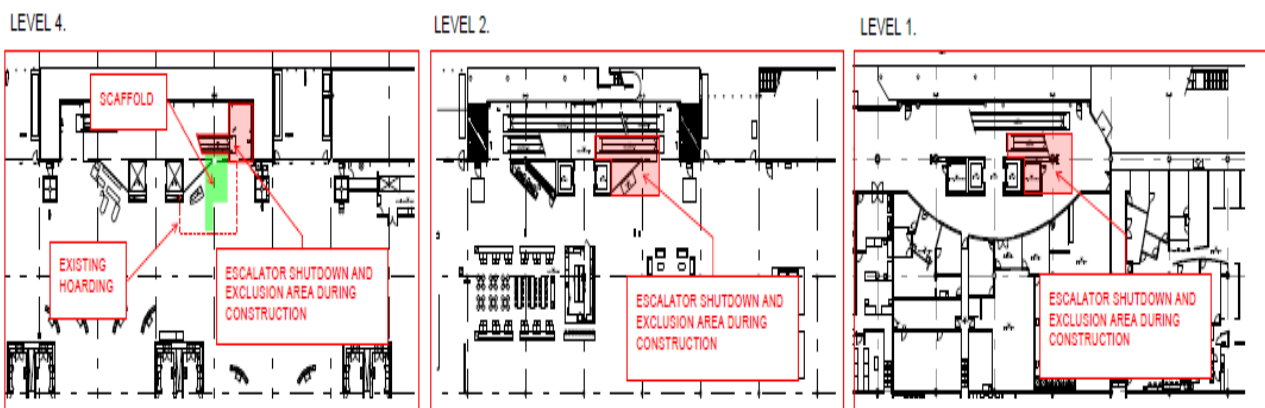

Time: 0600 start

Duration: Until completion of the works, 1 day or less

### Scaffolding removal

TBC

### Exclusion zones below:

NOTE - LEVEL 3 DOES NOT EXTEND INTO THIS AREA - NO EXCLUSION ZONE REQUIRED.
