

Stakeholder Notice

DTB Security Compliance Project

STK-N D348
Date 10 October 2025

To comply with Aviation Transport Security Regulations 2005 (Regulation 3.20), upgrade works are required on the level 2 bridges running between the concourse and the front of the terminal building to prevent the transfer of prohibited items into the sterile area. These works will commence Tuesday 14 October 2025 and take approximately 8 weeks.

Location

Domestic Terminal Level 2 – Northern Food Court – Mezzanine edge

Scope of Works

- Site investigations commence from 2100 on Tuesday 14/10/2025 – Saturday 18/10/2025. Works are to take place on level 1 using an Elevated Works Platform (EWP), near the northern oversized outbound location.
- Investigations will focus on confirming existing conditions of the affected areas, including inspections of the bridge structure and fixing locations for new steel framing.
- Exclusion zones will be established with protection measures in place to ensure safe separation between works and airport users, and to protect existing services and facilities.
- Construction activities will commence from 2100 on Sunday 16/11/2025 – 0300 daily for approximately 6 weeks. The access to the Qantas Administration office will be maintained with a pause in the exclusion zone between the hours 2359 – 0300 as required.
- Construction activities will occur both on level 2 and also on level 1 using an EWP. Exclusion zones will be established.
- Wayfinding and safety signage will be installed in consultation with BAC at suitable points around the works area. Signage will follow BAC Wayfinding Guidelines to give clear directions to passengers, visitors and stakeholders, and to restrict access to exclusion zones.

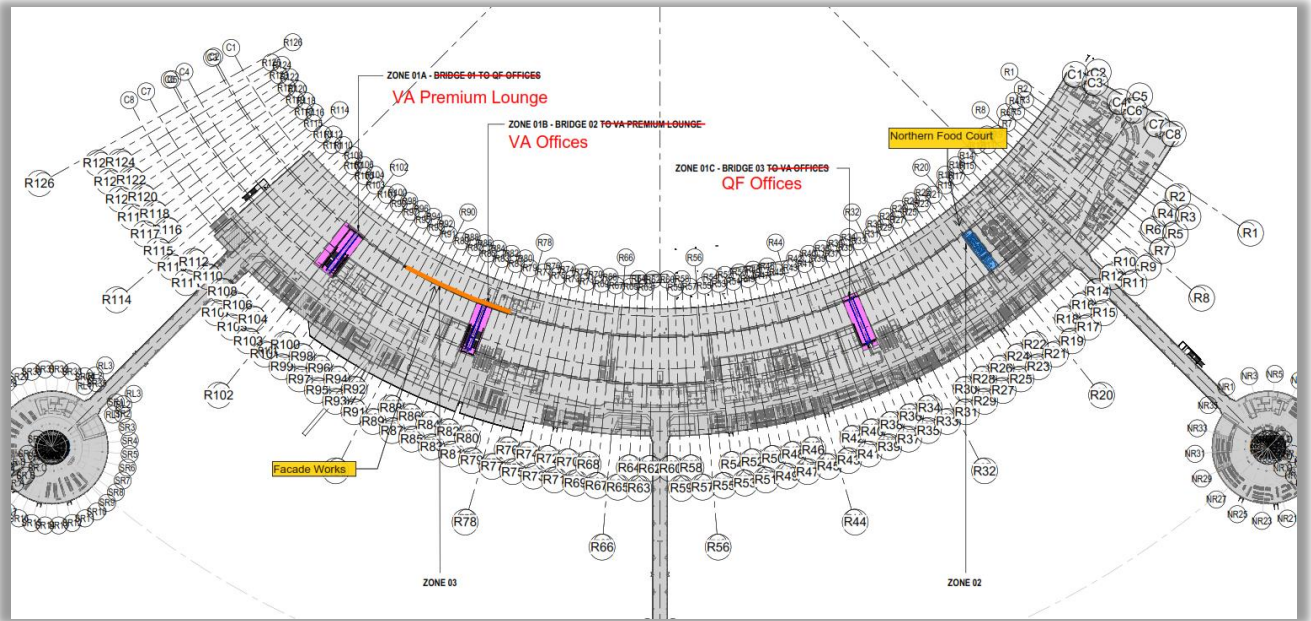

Figure 1 Overview of all work areas associated with the project

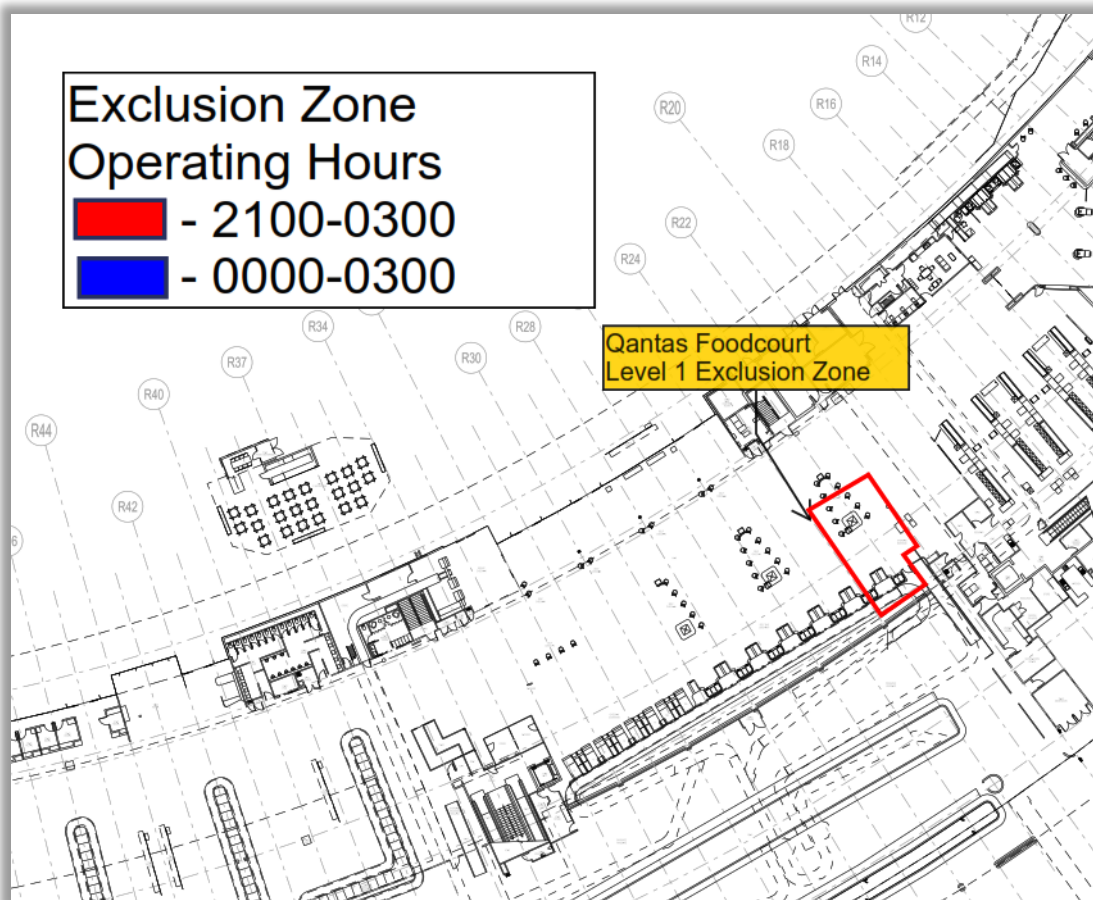

Figure 2 Level 1 exclusion zone

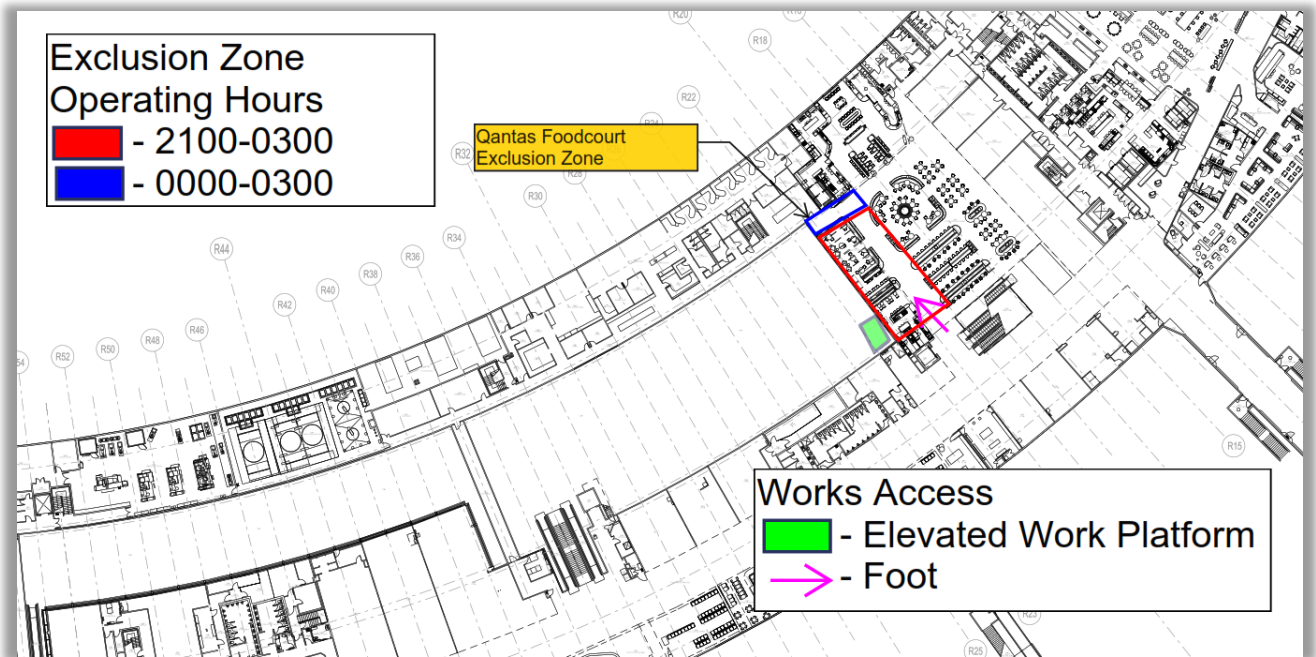

Figure 3 Level 2 exclusion zone

Impacts

All activities will take place after hours from 2100 - 0300.

Exclusion zones will be established only within the immediate works area and will be reduced or removed prior to reopening hours, ensuring no disruption to food court operations or passenger movements during the day.

Access to the Qantas Administration offices between the hours of 2359 – 0300 will require a pause in any works in the blue exclusion zone as identified in the Figure 3 above.
